

C.SCOPE CS880 METAL COVER LOCATOR

The CS880 Metal Cover Locator is a Metal Detector that is specifically designed to locate manhole covers, fire hydrant covers, valve box covers and meter box covers that are covered by grass, tarmac, sand, snow, paving or other material. It is able to detect the exact position of any metal covers that are no longer visible and require access.

Built by one of the world's leading manufacturers of Metal Detectors, the CS880 is simple to operate, lightweight and user friendly.

Simple to use.

Just turn on and go.

Audio and visual target identification

Fast response with fascia mounted speaker and headphone socket, LED indication of target.

Induction Balance

C.Scope's unique 'Induction Balance' Operating System provides maximum sensitivity to solid metal objects, while ignoring small metal objects that cause false signals.

Target Hold

'Target Hold' facility enables the operator to trace out the shape and size of the located object to provide the operator with a swift indication of what has been detected. Reduces time wasted on uncovering the wrong object.

Ergonomically designed

Custom designed handle, grip and twistlock stem length adjustment allows comfortable and prolonged use.
